the present ecological crisis has created new interest in and criticism of biblical attitudes toward nature in this book theodore hiebert offers a comprehensive examination of the ideology of a single biblical author the yahwist j writer of the oldest narrative sections of genesis exodus and numbers hiebert argues the importance of reading j in its ancient near eastern context his analysis incorporates evidence concerning the ecologies economies and religions of the ancient levant drawn from recent work in archaeology history social anthropology and comparative religion hiebert finds that despite the limitations of j s world view and the world in which it took shape j s ideology is relevant to contemporary efforts to frame a theology of ecology particularly valuable are j s views of reality as unified and non dualistic humanity as limited and dependent nature and humanity as interrelated and holding sacred significance and agriculture as a context for an ecological theology

genesis myth in beowulf and old english biblical poetry explores the adaptation of antediluvian genesis and related myth in the old testament poems genesis a and genesis b as well as in beowulf a secular heroic narrative the book explores how the genesis poems resort to the christian exegetical tradition and draw on secular social norms to deliver their biblically derived and related narratives in a manner relevant to their christian anglo saxon audiences in this book it is suggested that these elements work in unison and that the two genesis poems function coherently in the context of the junius 11 manuscript moreover the book explores recourse to genesis derived myth in beowulf and points to important similarities between this text and the genesis poems it is therefore shown that while beowulf differs from the genesis poems in several respects it belongs in a corpus where religious verse enjoys prominence

the first eleven chapters of genesis adam eve noah are to the twenty first century what the virgin birth was to the nineteenth century an impossibility a technical scientific exegesis of genesis 1 11 however reveals not only the lost rivers of eden and the garden s location but the date of the flood the length of the genesis days and the importance of comets in the creation of the world these were hidden in the hebrew text now illuminated by modern cosmology archaeology and biology the internet friendly linguistic tools described in this book make it possible to resolve the location the extent and the destruction of eden and noah s flood ancient egyptian greek norse sumerian and sanskrit mythology are all found to support this new interpretation of genesis combining science myth and the genesis accounts paints a vivid picture of the genetic

causes and consequences of the greatest flood of the human race it also draws attention to the acute peril our present civilization faces as it follows the same path as its long forgotten antediluvian ancestors discover why genesis has never been so possible so relevant as it is today

this full color textbook is based on the premise that god created the world approximately 6 000 years ago it takes key events from both the bible and world history and places them into a single time line great care is taken to separate fact from myth so that students can clearly understand how history unfolded during the world s first 3 000 years photographs throughout the text enhance the student s learning after completing the ancient history section students will embark on a journey through an american history timeline beginning with native americans in the 1500s and ending with the declaration of independence in 1776 multi level for grades 1 to 6 non consumable chronological timeline biblical worldview integrates both bible and world history american history timeline hands on learning activities encourages understanding of overall historical timeline covers the history of all continents
